LOAM CSA PROGRAM

We are excited to announce that Loam Agronomics has begun to deliver their Community Supported Agriculture (CSA) program to Cross Creek Ranch. The CSA is a weekly share of locally, sustainably grown produce delivered to you, and grown here in Fort Bend County. Members sign up online at Loamagronomics.com for a 4 week share of our seasonal bounty, and we deliver to the community room in your neighborhood. It's \$30 for 4 weeks, so your initial investment is \$120 with recurring payments after the fourth week. Each box contains 8-12 varieties of produce, equaling around a \$35-\$40 value. This program is an intimate relationship between the community and the farmer. By investing in the farm for 4 weeks at a time we are able to be more efficient in planning how much we will be planting, helping us to cut down on waste. You will receive a weekly newsletter telling you what's in your box, current events at the farm, storage techniques, member in residence blog, recipes curated by local chefs and invites to member events on our farm. **If you are going out of town on vacation or can't pick up your box for whatever reason you can simply login to your account and put your share on hold.** It's very flexible, and user friendly. Why register? Not only are you providing your family with a nutrient rich, delicious box of produce, but you are also supporting the growing local food movement in our region.

***PICK UP WILL BE EVERY WEDNESDAY FROM 12:00PM-5:00PM IN THE COMMUNITY ROOM LOBBY.**

SCHEDULE NOW FOR TREATMENTS TO PREVENT CATERPILLAR DAMAGE

A message from your Bartlett Arborist Representative,
Joseph Keefe

"Spring is when many tree pests become active and eggs laid by defoliating insects like buck moth, leaf rollers, and forest tent caterpillars start to hatch. The defoliation resulting from an infestation is unsightly and can limit a tree's ability to grow and thrive. With that in mind, I have already begun scheduling treatments to manage outbreaks and minimize the damage caused by caterpillars when they feed on new tree buds and leaves.

Given the prevalence of caterpillars in our area, I recommend an inspection in spring to assess your trees for signs of an infestation. When pests are present, early detection is important to effectively prevent an outbreak."
